ABOUT ME

Results-driven software engineer with three years of experience specializing in optimizing system efficiency through codebase refactoring, database query improvements, and effective caching strategies. Proficient in C# (.NET), SQL, and JavaScript. Led successful API integrations (Facebook, Instagram, Twitter, LinkedIn, ChatGPT, Stripe) to enhance system functionality. Proven ability to lead projects, collaborate with cross-functional teams, and deliver innovative solutions.

Experienced in developing scalable web applications using ASP.NET Core and MVC architecture. Skilled in troubleshooting performance issues and implementing secure coding practices.

EDUCATION

Master in Computer Science (MCS)
PMAS Arid Agriculture University, Rawalpindi
GPA: 3.05/4.00

PROJECTS

Atlantic International University (AIU)
.NET Core
Atlantic International University - AIU (LMS) Email and Notification Modules: Spearheaded the development of modules for seamless email communication and enhanced user engagement. Utilized C# - .NET Core 8.0 and JavaScript to integrate SMTP functionality, a template system, and push notifications. Library Navigation and Content Uploading Modules: Optimized AIU library access by integrating the Kendo File Manager for smooth file and folder operations. Innovated a generic Excel file reading module, streamlining content uploading and report generation Core Module: Worked on the legacy code, gradually transitioning legacy code to .NET Core 6.0 and adopting a layered architecture, eventually moving towards a clean architecture.

Galaxy Boys Hostel
.NET Core Web API & Angular
Developed using ASP.NET Core MVC, .NET 8.0 Web API, and Angular, this platform streamlines student registration, room allocation, fees, and attendance management. Built RESTful APIs for frontend-backend communication and implemented modules for student records, room management, and fee tracking. Integrated SQL Server and Entity Framework Core with layered and clean architecture.

TMS

.NET
Developed using .NET Framework, streamlining student information, schedules, and grades management. Implemented Tutor Management Module for seamless tutor-student interaction. Designed Login and Authentication Module with secure user access. Migrated legacy code to .NET Framework, adopting layered and clean architecture.

ChatBot

HTML|CSS|Javascript
An AI-powered Chatbot System built using HTML, CSS, and JavaScript, designed for seamless user interaction. It features real-time messaging, dynamic responses, and API integration. With a user-friendly interface and responsive design, this chatbot enhances communication and automates support efficiently, making it ideal for businesses and interactive applications.

EXPERTISE

C# | .NET | ASP.NET Core | Angular | React |
JavaScript | jQuery | SQL | Entity Framework
Core | Dapper | Telerik Kendo UI

EXPERIENCE

.Net Developer
Soft Tech Media Private Limited Islamabad
Feb-2023 - Present
Worked with ASP.NET Core, Razor Pages, and MVC, developing and integrating RESTful APIs while ensuring secure, optimized backend development and database management. Integrated Facebook, Instagram, Twitter, LinkedIn, and ChatGPT APIs, implemented role-based access control, and enhanced system performance. Focused on AJAX-based interactions, frontend-backend integration, and scalable deployments. Contributed to code reviews, troubleshooting, and feature development, maintaining clean, efficient, and high-performing code.

Collaborated with cross-functional teams to resolve issues, enhance user experience, and deliver high-quality solutions. Implemented query optimization techniques to improve database efficiency. Developed dynamic dropdown modules, modal-based CRUD operations, and generic Excel file reading functionality. Worked on legacy code migration to .NET Core, ensuring clean architecture principles and system maintainability.

.Net Developer
Innovator Brain Private Limited
2021 - 2022
Worked on ASP.NET Core and MVC, developing RESTful APIs, implementing authentication, and optimizing system performance. Utilized jQuery, JavaScript, and AJAX for seamless frontend-backend communication. Improved database efficiency through query optimization, contributed to feature development, and implemented modal-based CRUD operations. Collaborated in migrating legacy code to .NET Core with a clean architecture approach, ensuring code scalability and maintainability.
